About me

I am a Front-end Developer who has chosen to build experience on a solid foundation of JavaScript. After spending over 1.5 years learning the language, and diligently working with the guidance of a mentor, I can confidently say that I have mastered good design practices and have over 16 coded JS applications to my credit.

Competencies

javascript (6 months)

react (4 months)

typescript (3 months)

css (8 months)

html (12 months)

scss (5 months)

trelo (2 months)

jira (3 months)

git (8 months)

Experience

INVO Academy

02.2023 - 06.2023

I spent 4 months on the INVO training platform, building over 14 advanced projects under the guidance of mentors.

Coding Bootcamp

01.2019 - 01.2023

I attended a 3-month programming bootcamp where I created my first web application project.

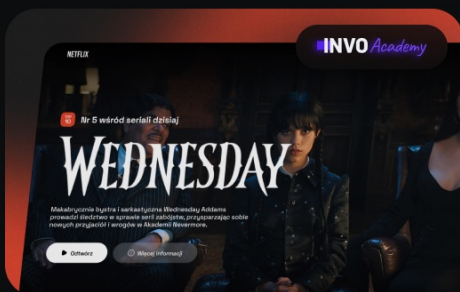

Education

Polish-Japanese Academy of Information Technology - Master of Science

01.2019 - 01.2023

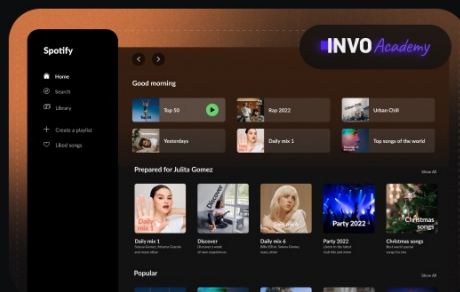

Master's degree in computer science with a specialisation in software engineering and databases. During my studies I gained knowledge of, among other things, the analysis, design and administration of large IT systems.

Projects

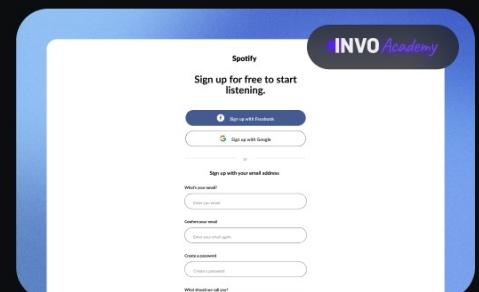

Netflix - Dashboard view

I coded Netflix's main screen, using React.js

[GitHub](#)
[Live demo](#)

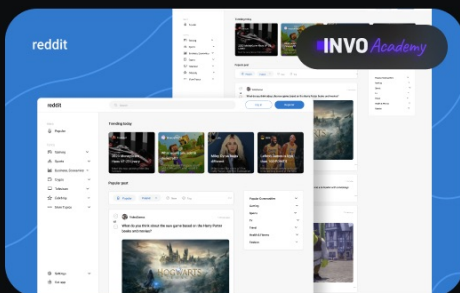

Spotify - Playlist view

I built a Spotify playlist view containing the greatest hits from around the world.

[Github](#)
[Live demo](#)

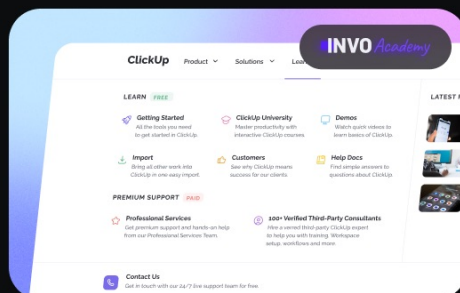

Spotify - Login and register

I created a user authorisation module and pages with a interactive registration forms.

[GitHub](#)
[Live demo](#)

Reddit - Main page

I coded the home page view of the Reddit website (React) along with the implementation of the logic.

[GitHub](#)
[Live demo](#)

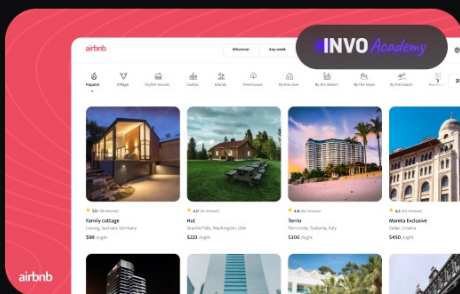

ClickUp - Interactive menu

Coding Mega Menu - drop-down with lists of options, using reusable components.

[GitHub](#)
[Live demo](#)

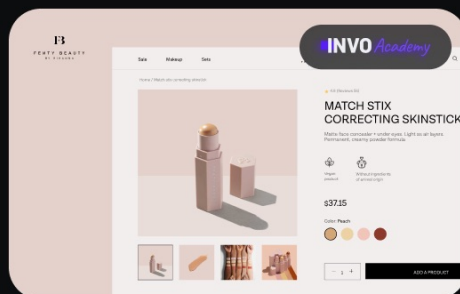

Signal - Chat pages

I created a chat view in the Signal app using React technology.

[GitHub](#)
[Live demo](#)

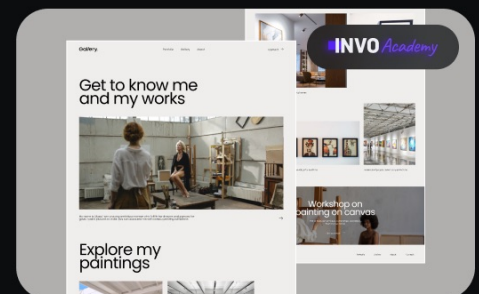

Airbnb - Hotels listing

I built an Airbnb app screen with a list of hotels, a filter mechanism and navigation.

[GitHub](#)
[Live demo](#)

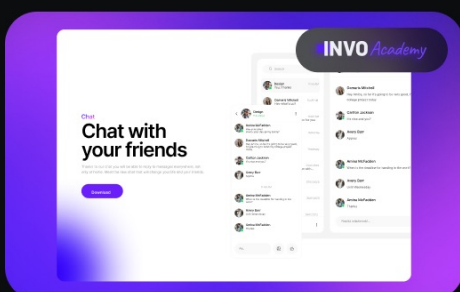

Fenty Beauty - shopping page

I coded a product view with the ability to change variants and an interactive gallery (React).

[GitHub](#)
[Live demo](#)

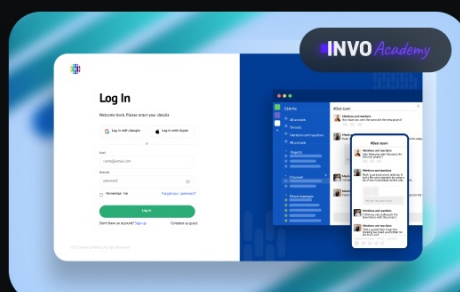

Art gallery landing page

I coded an art gallery landing page using HTML and SCSS.

[GitHub](#)
[Live demo](#)

App with chat functionality

I built an app with a function to search for a user and start a chat.

[GitHub](#)
[Live demo](#)

Registration module

I have created a registration view with the integration of the full system logic.

[GitHub](#)
[Live demo](#)

Cards view

I coded the card view on the page, using HTML and SCSS.
